ABOUT SAE INSTITUTE AMMAN:

SAE Institute has more than 54 campuses in 27 countries worldwide. The institute offers BA, diploma programs, and short courses in Film Production, Audio Production, Visual Effects and Animation, and Digital Media Design. All courses are accredited locally and internationally.

SAE courses are taught by international and local experts with academic and industry backgrounds in their chosen fields.

The SAE model is built on working closely with industry partners, delivering programs through world-class facilities, tools and studios that are responsive to the dynamic and evolving nature of the creative industry.

OUR VISION:

To be the world's leading educator for the creative media industries.

OUR MISSION:

To graduate highly skilled and industry-ready students through combining high-end technology with the different applications of practical training.

OUR PROGRAMS:

SAE Institute Amman offers a range of creative media training including: Film Production, Audio Production, Visual Effects, and Animation, and Digital Media Design.

CAMPUS FACILITIES

SAE's main recording facility contains the legendary Neve 88 RS console, among the few consoles, used by the industries greatest producers. This same model can be found In Abbey Road Studios (used to record the Beatles) and Ocean Way Studios (used to record Micheal Jackson). A large control room equipped with large Genelec speakers and two live rooms enables engineers to record multiple artists with the highest quality of control and monitoring.

Producers and audio professional's worldwide love to use the powerful Apolo interface. Due to its capability in immolating professional audio gear, engineers can audition and record signals through globally renowned Microphones and racks. At SAE's Apolo studio, the control room is equipped with KRK monitors and a large live room capable of recording any artists with any genre.

The icon studio is equipped with a D-Control console and a 5.1 Genelec speaker setup to be used in post productions projects. It is acoustically treated and designed for audio production work focused mainly for cinema and home entertainment. However, due to its large live room and Neve/Focus-rite preamps, it is also utilized as a recording studio.

To complete the list of audio engineering console formats, SAE has two facilities equipped with two Yamaha digital mixers. The main advantage of digital mixers is to provide a quicker workflow for the engineers. However, being that it is in SAE's professional acoustically- treated studios that are equipped with Genelec speaker and multiple preamps, these consoles are capable working with any audio production needs (recording, mixing and mastering).

Electronic Music Production EMP & DJ (36 Hours)

Overview :

- The unique Electronic Music Production course provides an opportunity for music enthusiasts to express their passion for sound on the best music equipment, training with international industry professionals. The program encourages individualism and combines the fundamentals of electronic music production with practical experimentation and personal creativity. Students will graduate from the 4- weeks program with the skills and knowledge to create the music they love and gain a strong foundation for future learning
- The course is designed to focus students learning experience as much as possible on the practical use of computer sequencing, MIDI programming, synthesis and sampling, sound manipulation and hard disc recording. Students receive professional training focused on industry standard electronic music applications and software.

Electronic Music Production EMP & DJ

Course Outcomes :

- Students will have a greater understanding of the internal structure of the electronic music production industry
- Students will be able to produce their own electronic music tracks with high standards based on what they've learned
- Students will be able to perform advanced production operations such as sound manipulation and creative plug-in automation
- Students will have a great grasp on navigating the complexities of synthesizers and samplers
- Students will become proficient in the use of certain DAW's, their tools and instruments, as well as MIDI platforms
- Students will be able to mix and master their productions to high standards
- Students will be able to export their productions in stems format, and will learn how to perform their productions through live DJing

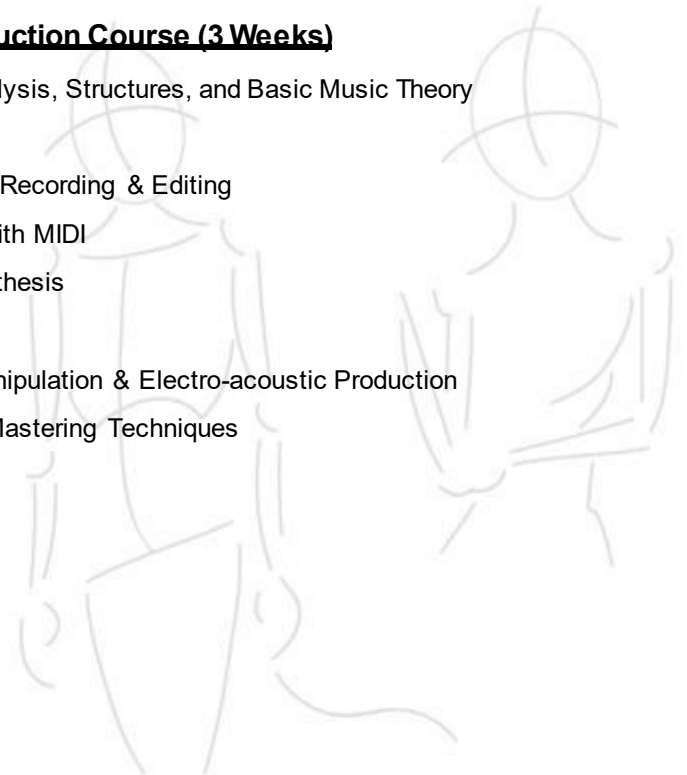

Course Outline

EMP - Foundation Course (1 Week)

- Introduction to Audio Industry & EMP
- Basic Sound Theory & Studio Studies
- Equalization & Filtering
- Dynamic Processing
- Effects

EMP – Production Course (3 Weeks)

- Song Analysis, Structures, and Basic Music Theory
- DAW's
- DIY Audio Recording & Editing
- Working with MIDI
- Audio Synthesis
- Sampling
- Sound Manipulation & Electro-acoustic Production
- Mixing & Mastering Techniques
- DJing
